PROFESSIONAL SUMMARY

Designing the future with AI. An AI engineer transitioning from diplomatic and overseas affairs to AI development. Identifying strategic problems and building precise, insightful solutions with cutting-edge AI modeling. Expert in bridging complex communication and technical innovation.

EXPERIENCE

Foreign Affairs & Administrator *Secretary for National Assembly* 2019.07 – 2025.06

Led diplomacy and macro overseas affairs at the Republic of Korea National Assembly and major law firms (Choongjeong, Lee & Ko).

Lee & Ko (Apr. 2022 – Jun. 2025)

- Established and managed the Korea-Middle East Sustainable Development forum.
- Administered high-level meetings and overseas trips with government and private entities.
- Maintained relations with parliamentary staff to advocate for legislative adjustments and mitigate regulatory risks.

HMP Law (Jul. 2020 – Apr. 2022)

- Managed relations with foreign dignitaries to assist cooperation with Korean companies.
- Served as a lead Korean-English interpreter during high-stakes meetings.

National Assembly of Korea (Jul. 2019 – May. 2020)

- Researched foreign legislations for domestic implementation and policy drafting.
- Requested and analyzed deep-dive data from overseen organizations for hearings.
- Organized foreign VIP relations and managed high-volume global correspondence.

Workforce Management & Apple Advisor *Concentrix Korea* 2018.04 – 2019.02

- Managed call center attendants' schedules according to global office and client standards.
- Identified system inefficiencies and implemented process optimization for performance.
- Assisted in-call customers as a Tier 4 Senior Advisor (Highest Level) for Apple products.

EDUCATION

Miami University, USA (OH)

B.A. in International Studies (Specialization: Economic Development)

IBM x RedHat AI Transformation

AX Academy (Certificate)

PROJECTS

Vaccine Daily (AI News Pipeline) Team (3 members)

Implemented an efficient Multi-Agent system for personalized news reports by optimizing token usage and integrating various ML packages beyond a single LLM.

Football Prediction System Individual Project

Developed TensorFlow ensemble with RL-based confidence optimization and Monte Carlo simulation engine.

SKILLS

Frontend	React, Next.js, JavaScript, HTML/CSS, Framer Motion
Backend / AI	Python, FastAPI, TensorFlow, GraphRAG, Agentic AI, XGBoost, LightGBM
Database	PostgreSQL, MySQL, ChromaDB, SQLAlchemy
Infra / DevOps	Docker Compose, AWS EC2, Git, Vercel, WebSocket
