CONSUMER BUSINESS DEVELOPMENT — APPLE KOREA

Seoul-based, work-authorized (Korean citizen), native Korean and native English. Began his career operating the Apple APAC Tier-4 advisor floor in Korea under Concentrix — 30+ advisors, CSAT- and AHT-based SLA to Apple global-office standards. Layered six years of cross-border commercial work at Lee & Ko, HMP Law, and the National Assembly Policy Committee on top, including the 2023 KOFIA × UAE/Singapore co-investment LOI and the SNU Dental × Mubadala Health MOU (2024). Currently operating a live multi-region e-commerce platform with auto-translated catalogs across five languages — direct hands-on with consumer commercial constructs and channel economics.

CORE COMPETENCIES

Commercial: Six years of cross-border deal work at Lee & Ko, HMP Law, and the National Assembly Policy Committee — structured LOIs and MOUs against senior counterparties.

Apple ecosystem: One year operating Apple APAC Tier-4 advisor floor under Concentrix to Apple global-office SLA standards.

Languages: Native English and Korean; conversational Mandarin.

APPLIED AI & SOLUTIONS ARCHITECTURE

AIIM — Production Agentic Platform for Global Influencer Discovery

LIVE · 2025–PRESENT

Architect & Operator

Stack: LangGraph, GraphRAG, FastAPI, GCP Cloud Run, Next.js, Cloud-Hosted

- Operates a **24/7 production platform serving 5,300+ creators across 14 languages** — the live system, not a prototype.
- Built a “probe-before-bulk” safeguard after a vendor-budget incident, turning unpredictable paid-API run-rates into a managed line item.
- Architecture ingests three independent data sources in parallel and unifies them into one decision-grade record per creator.

Vaccine Daily — Multi-Agent News Intelligence Pipeline

IBM X REDHAT TOP AWARD · 2025–2026

Architect

Stack: HDBSCAN, ChromaDB, ko-sroberta, Kiwi, FastAPI, Multi-Agent RAG

- Engineered a **Writer -> Critic -> Editor multi-agent loop** that adjudicates every output against source documents on a PASS/FAIL gate — eliminates the manual fact-check step for time-sensitive news desks.
- Reduced LLM API spend via clustering and embedding-cache strategies that skip duplicate work — cost discipline transfers to any high-volume retrieval deployment.
- Surfaces per-outlet reporting bias across 10 Korean news sources, giving editors a structural read on coverage before they assign.

FOBO AI — 8-Stage ML/RL Pipeline for European Football Markets

LIVE · 2025–PRESENT

Architect & Operator

Stack: PyTorch, Transformer, GAT, PPO, XGBoost, LightGBM, GCP Compute Engine

- Engineered an **8-stage production ML pipeline** serving 13 European leagues at **sub-200ms inference latency** on a single e2-medium CPU — Transformer encoder, Graph Attention Network, and gradient-boosted ensemble feed a 2080-dim embedding into a PPO reinforcement-learning decision layer.
- Runs the full pipeline on a 2-VM cloud setup at **~\$26/month** with on-demand Spot GPU retraining at ~\$0.40 per run — proves production-grade ML does not require enterprise infrastructure budgets.
- RL decision layer optimizes for **risk-adjusted yield, not raw accuracy** — the standard alpha framework, ported from financial markets to structured event data.

KOKKOK Garden — Multi-Region E-Commerce with AI Localization

LIVE · MAR 2026–PRESENT

Founder & Operator

Stack: Next.js, React, TypeScript, Tailwind v4, Supabase, PostgreSQL + RLS, GPT-4o-mini, Vercel

- Live multi-region platform with **GPT-4o-mini-powered automatic product translation across 5 languages** (24-hour cache), serving a Korean purchase storefront and a global viewing + AI-consultation route from one codebase.
- PostgreSQL Row-Level Security multi-tenant architecture with an LLM K-beauty consultation assistant on the global storefront; **14 admin modules** let a single non-technical operator run the catalog end to end — transfers directly to any cross-border e-commerce.

PROFESSIONAL EXPERIENCE

Lee & Ko (법무법인 광장)

Seoul, Korea

Foreign Affairs & Cross-Border Deal Staff · Apr 2022 — Jun 2025

- Closed** a co-investment LOI between the Korea Financial Investment Association (KOFIA), Top-10 Korean financial institutions, and UAE / Singapore sovereign wealth funds (signed 2023). Structured through the Korea–Middle East Sustainable Development Forum where I served as Secretary (사무장).
- Coordinated** the SNU Dental x Mubadala Health MOU (2024) from thesis alignment through bilateral term-sheet drafting and ministerial sign-off — the framework for residency and faculty rotation remains in active use today.

HMP Law (법무법인 충정)

Seoul, Korea

Foreign Affairs & Cross-Border Deal Staff · Jul 2020 — Apr 2022

- Ran** continuous thesis-tracking research on six sovereign wealth funds — ADIA, Mubadala, PIF, QIA, GIC, Temasek — mapping each fund's allocation theses against live Korean deal flow.
- Built** the bilateral counterparty pipeline that fed the 2023 KOFIA LOI and 2024 SNU Dental x Mubadala MOU — pre-LOI thesis alignment, stakeholder mapping, term-sheet groundwork.

National Assembly of the Republic of Korea

Seoul, Korea

Grade-7 Secretary & Foreign Affairs Liaison — Office of Rep. Kim Jung-Hoon · Jul 2019 — May 2020

- Covered** National Policy Committee (정무위원회) oversight sessions on FSC, FSS, and KFTC — the macro-regulatory frame that informs every cross-border capital conversation I run.
- Drafted** foreign-affairs briefing materials and bilateral correspondence in Korean and English for the office's engagement with Middle Eastern diplomatic and sovereign-capital counterparties.

Concentrix Korea (Apple ecosystem)

Seoul, Korea

Workforce Manager & Apple Tier-4 Senior Advisor — Client: Apple · Apr 2018 — Feb 2019

- Operated** a **30+ advisor Apple APAC inbound technical-support floor** as Workforce Manager — built 24/7 shift scheduling, capacity planning, and **CSAT- and AHT-based SLA governance** to Apple global-office and client standards.
- Advised** at Tier-4 senior-advisor level on the most complex English-language Apple technical escalations; ran process-inefficiency teardown across the support floor and translated client requirements into operational changes — first exposure operating under Fortune-50 multinational service standards.

EDUCATION & AWARDS

- **IBM x RedHat AI Transformation Academy** — Top Award (최우수상), 2025.08–2026.02. Capstone: Vaccine Daily multi-agent news pipeline.
- **Miami University, Ohio, USA** — B.A. International Studies, concentration in Economic Development.
- **Taejon Christian International School (TCIS)** — IB Certificate, English-medium curriculum.
- **Daegu American High School (U.S. DoD School)** — High School Diploma, U.S. K-12 English-medium education.
