### PROFESSIONAL SUMMARY

I turn ambiguous problems into end-to-end AI systems. Five years leading diplomatic and overseas affairs at the Korean National Assembly and top-tier Korean law firms sharpened my instinct for stakeholders and strategic context — I now apply it to designing AI solutions from data pipeline to modeling to decision loop, rather than dropping a model into a feature and calling it done.

### PROJECTS

#### IAMX6 — Naver Blog Automation Desktop App

Solo · Private Repo

Electron · Puppeteer-core · Node.js · AI/LLM · electron-builder

Shipped as an Electron desktop app (not web). Puppeteer drives a real Naver browser session, an AI model writes context-aware comments, distributed as a single Windows portable .exe.

#### KOKKOK Garden — K-Beauty Multi-region E-commerce

Individual Project

Next.js 16 · TypeScript · Supabase · GPT-4o mini · Vercel

Full stack (frontend → backend → DB → chatbot) built via vibe coding. Auto-splits KR/GL stores; GPT-4o mini translates products into 5 languages. (<https://kokv2.vercel.app>)

#### AIIM — AI Influencer Match

Individual Project

Python · FastAPI · Next.js 14 · PostgreSQL (Cloud SQL) · Selenium · LLM · GCP Cloud Run

End-to-end cloud platform ingesting 5,300+ creators across YouTube/Instagram/TikTok in 14 languages, matched to brands via LLM reasoning. Runs 24/7 on GCP Cloud Run + Cloud SQL. Live: [aiim-frontend-559416574965.asia-northeast3.run.app](http://aiim-frontend-559416574965.asia-northeast3.run.app) · [github.com/jeonhs9110/AIIM-Showcase](https://github.com/jeonhs9110/AIIM-Showcase)

#### Vaccine Daily (AI News Pipeline)

Team (3 members)

Implemented an efficient Multi-Agent system for personalized news reports by optimizing token usage and integrating various ML packages beyond a single LLM. Live: [jeonhs9110.github.io/vaccine-daily/](http://jeonhs9110.github.io/vaccine-daily/) · [github.com/jeonhs9110/vaccine-daily](https://github.com/jeonhs9110/vaccine-daily)

#### FOBO AI — European Football Prediction

Individual Project

End-to-end ML system wiring PyTorch Transformer + GAT + PPO RL into an 8-stage pipeline across 13 European leagues, hitting ~90% (ensemble) and ~95% when PPO agrees. Runs on GCP 2-VM for ~\$26/mo. Live: <http://34.64.147.124/> · [github.com/jeonhs9110/epl-showcase](https://github.com/jeonhs9110/epl-showcase)

#### Crazy Arcade Web Replica

Team (4 members)

React · FastAPI · WebSocket · MySQL

Designed a WebSocket-driven state-sync system across lobby → waiting room → game room, handling real-time concurrency problems that plain HTTP cannot express.

#### Goblin Shopping Mall (E-Commerce SPA)

Team (4 members)

React · JavaScript · CSS · Vercel

Integrated an external product API, built 18+ category filters, search, and cart — ran the full pipeline from idea to Vercel deployment as a team.

#### My Diary (Emotion Log App)

Individual — Educational

React · Context API · localStorage

Designed global state from scratch with Context API + useReducer and shipped persistence with only localStorage, proving a useful app can ship without a backend.

### EXPERIENCE

**Foreign Affairs & Administrator** *Secretary for National Assembly*

2019.07 – 2025.06

Led diplomacy and macro overseas affairs at the Republic of Korea National Assembly and major law firms (Choongjeong, Lee & Ko).

**Lee & Ko (Apr. 2022 – Jun. 2025)**

- Established and managed the Korea-Middle East Sustainable Development forum.
- Administered high-level meetings and overseas trips with government and private entities.
- Maintained relations with parliamentary staff to advocate for legislative adjustments and mitigate regulatory risks.

**HMP Law (Jul. 2020 – Apr. 2022)**

- Managed relations with foreign dignitaries to assist cooperation with Korean companies.
- Served as a lead Korean-English interpreter during high-stakes meetings.

**National Assembly of Korea (Jul. 2019 – May. 2020)**

- Researched foreign legislations for domestic implementation and policy drafting.
- Requested and analyzed deep-dive data from overseen organizations for hearings.
- Organized foreign VIP relations and managed high-volume global correspondence.

**Workforce Management & Apple Advisor** *Concentrix Korea* 2018.04 – 2019.02

- Managed call center attendants’ schedules according to global office and client standards.
- Identified system inefficiencies and implemented process optimization for performance.
- Assisted in-call customers as a Tier 4 Senior Advisor (Highest Level) for Apple products.

**EDUCATION**

---

**Miami University, USA (OH)**

B.A. in International Studies (Specialization: Economic Development)

**IBM x RedHat AI Transformation**

AX Academy (Certificate)

**SKILLS**

---
